Tips and tricks for using  
rjschinner.com

**Today's Tip**  
Download a price book or reorder pad for offline use

Download on demand on with the new **Price Book Download** page! Gone are the days requesting data files from an Rj Schinner employee. Just visit the Price Book Download page to enjoy all these benefits.

**AVAILABLE OFFLINE.** No longer are you tethered to the internet when you can save a **Price Book** or **Reorder Pad** to your computer or server. Offering greater flexibility and convenience, the downloaded file is a streamlined version of the online version.

**DATA MANIPULATION.** Manipulate data to suit your needs, in spreadsheet programs like MS Excel. Delete unnecessary information, sort by different categories, or use formulas to turn raw data into trends – enabling you to take ownership of your information.

**SEND AND PRINT.** With a Price Book or Reorder Pad, it's easier to print and send information when you control the information. Print files as a handy, portable reference, or securely e-mail to coworkers, customers, or anyone without access to your online account.

### Why Sections? Here's Why.

*You may notice the price book is split into 6 sections.*

Since our Price Books are packed with information, downloading a complete book at once consumes bandwidth. Dividing the Price Book into sections speeds overall download.

### Two Types of Reorder Pads

*Two types of reorder pads available at [www.rjschinner.com](http://www.rjschinner.com).*

- 1 – Use the reorder pad link on your My Account page to view item profiles and add items to your cart.
- 2 – Use the reorder pad link on the Price Book page to download a reorder pad spreadsheet for offline use.
